

Senior Systems

Since 1992, Senior Systems has helped private secondary and independent K-12 schools to efficiently and productively manage their operations with scalable database system offerings for the business office, academic office, and alumni and advancement offices that help to streamline tasks and build efficiencies across schools.

With a commitment to providing the best software and services, Senior Systems' clients also benefit from project management, consulting, training and support.

INTEGRATING YOUR TWO SYSTEMS.

A secure way to automate datasheet uploads.

The integration between Senior Systems and Finalsite replaces manual datasheet uploads, saving you time and greatly enhancing the accuracy and timeliness of your data in Finalsite. Data flows one way from Senior Systems into Finalsite. This data is used for eNotify contact lists, online directories, class pages and rosters, and is scheduled to sync automatically in Finalsite. In addition to managing classes, teachers can save time by using the LMS to manage gradebook and attendance data. With the Senior Systems export template, this data can be easily exported for import back into Senior Systems by a site administrator with no extra work for teachers.

HOW IT WORKS.

Save time and ensure data integrity with automatic transfers.

-  Automatic data transfers run hourly to refresh constituent information from Senior Systems in Finalsite, with a full data refresh each night.
-  Single Sign On (SSO) links allow students, parents, faculty, and alumni to update their own information without having to re-authenticate into Senior Systems. Users are also able to pass from Finalsite to all available "deeplink" locations within Senior Systems.
-  All connections take place over a secure SSL connection, while an Intrusion Protection System continually scans incoming traffic for malicious activity, keeping constituent data safe.

SUPPORTED DATA POINTS

All Users	First Name • Last Name • Middle Name • Nickname • Initials • Maiden Name • Name Prefix • Name Suffix • Username • Gender • Birthdate • Job Title • Degree (1-5) • Title (1-5) • Unpublish • Address Email • Phone
