

InResonance

InResonance’s cost-effective database solutions aim to increase schools’ productivity and innovation through a suite of open, customizable databases built in FileMaker® Pro software.

Linked web apps bring flexibility to admissions and enrollment, registrar functions, and fundraising and constituent management, all in a simple, intuitive user interface that is scalable to meet the differing needs of upper and lower schools. Its pared-down Sandbox product effectively serves K-8 schools with software tailored to them.

INTEGRATING YOUR TWO SYSTEMS.

A secure way to automate datasheet uploads.

The integration between inResonance and Finalsite replaces manual datasheet uploads, saving you time and greatly enhancing the accuracy and timeliness of your data in Finalsite. Data flows one way from inResonance into Finalsite. This data is used for eNotify contact lists, online directories, class pages and rosters, and is scheduled to sync automatically in Finalsite.

HOW IT WORKS.

Save time and ensure data integrity with automatic transfers.

-  Automatic data transfers run hourly to refresh constituent information from inResonance in Finalsite, with a full data refresh each night.
-  Single Sign On (SSO) links allow students, parents, faculty, and alumni to update their own information without needing to log back into inResonance.
-  All connections take place over a secure SSL connection, while an Intrusion Protection System continually scans incoming traffic for malicious activity, keeping constituent data safe.

SUPPORTED DATA POINTS

Students	Serial • ID Student • Division • ID Family (1-4) • P1a_Relation • P1b_Relation • P2a_Relation • P2b_Relation • P3a_Relation • P3b_Relation • P4a_Relation • P4b_Relation • First Name • Last Name • Middle Name • Nickname • Suffix • Email • Academic Year • Grade_Current • Grade_SortOrder • Campus • State_ID • Gender • DOB • Race • Hispanic_Latino • Ell_Status • FrI_Status • Iep_Status • Student_Email • Contact_Type
Parent	ID Parent • ID Family • business_city • business_country • business_fax • business_name • business_phone • business_state • business_street • business_title • business_zip • email • first • first_ovr • last • middle • occupation • phone_cell • prefix • suffix
