

WCBS

WCBS's management information systems give independent international schools powerful software to perform classroom, administrative and alumni relations tasks with ease.

Their 3Sys product helps teachers and administrative staff complete essential tasks, manage documents, and communicate with home and school; PASS Finance provides schools with a financial management toolset; and Web Alumnus gives schools a web-based management system that equips schools to build alumni connections and create value.

INTEGRATING YOUR TWO SYSTEMS.

A secure way to automate datasheet uploads.

The integration between WCBS and Finalsite replaces manual datasheet uploads, saving you time and greatly enhancing the accuracy and timeliness of your data in Finalsite. Data flows one way from WCBS 3Sys into Finalsite. This data is used for eNotify contact lists, online directories, class pages and rosters, and is scheduled to sync automatically in Finalsite.

HOW IT WORKS.

Save time and ensure data integrity with automatic transfers.

Automatic data transfers run hourly to refresh constituent information from WCBS 3Sys in Finalsite, with a full data refresh each night.

All connections take place over a secure SSL connection, while an Intrusion Protection System continually scans incoming traffic for malicious activity, keeping constituent and class data safe.

For a complete list of supported data points, please inquire at www.finalsite.com/wcbs
